

FOR IMMEDIATE RELEASE

August, 2005

Looking to speed up your ice paint application process?

Jet Ice Limited, the world's largest supplier of quality ice paint has developed a revolutionary new product, the "Paint Stick". This amazing product is designed to allow one technician to accurately apply lines and circles on the ice surface.

The "Paint Stick" design is lightweight, offers the flexibility to adjust the liquid paint flow and best of all, stand upright during the application process. Directions for use of this product are offered through seminars, DVD or written instructions.

Please visit our website @ www.jetice.com for more information on our additional product lines.

Jet Ice Limited - celebrating over 25 years in the ice making industry!
